## CeDe Safety glass

Safety glass (Dol-protection) for excavators 14 tonnes and more:

The safety requirements for plant and machinery working in environments where blasting (demolition) works has been carried out must be equipped with a protection against undetonated blasting charge (Standard EN 1063:1999).

Also for machines working in forest and in scrap yards the safety glass will be useable.

The glass, by standard BR4NS, is 21 mm thick and is fitted in a steel frame and replaces the standard wind shield.

The CeDe Safety glass can also be fitted on wheel loader cabs.
