

# Articulated Haulers

## Transport solutions

CeDe Group AB designs, develops and manufacture purpose built machines for special applications and complete products. Our customers and partners are world leading companies within Mining, Construction Equipment and Offshore. CeDe Group has a unique competence in customizing Construction Equipment, and in partnership with Volvo Construction Equipment we can equip the Articulated Hauler chassis with a wide range of bodies.

The articulated hauler is a platform for a wide range of different applications. The cornerstone is a transport concept consisting of a tractor and a two-wheel or four-wheel trailer. The load body can be replaced by many retrofits to meet different needs.

The result is effective solutions that are suitable e.g. for waste handling, industrial transport, forestry and container hauling. All these different variants however retain the advantages of the standard concept – performance, reliability, operating economy, as well as genuine service support and fast spare parts supply.

From idea to  
complete product!

# Water tank unit & Container hauling

## Water and lube tanks

A water and lube tank unit on articulated hauler, designed for heavy-duty actions in demanding environments. With several optional features.

Useful for simple water transportation but also for tasks in combination with water pump, spray nozzle on spreading ramp, water cannon. Water pump and spraying will be controlled from control panel in the hauler cab.

### Basic features

Water level indicator on tank side  
Pump for water filling and discharging. 6 m suction hose is included.  
Storing box for hose couplings etc. in tank front.  
15 m 1" hose for cleaning, with jet nozzle and shut-of valve.  
Rear lights and reverse lights.  
The tank unit is coated and painted for long and strong protection  
Reinforced surge plates.

The water tank volume can be adjusted for each size of hauler.

### Optional features

#### Water cannon with a wide range of use, in all types of environments.

Top mounted water cannon in stainless steel.  
Controlled by a joystick in the cab.

#### Spray watering system

Low-level fixed ramp of heavy tube for free fall spreading of water in the vehicle width.  
Operated from the cab.  
The ramp tube can be maintaining easily.

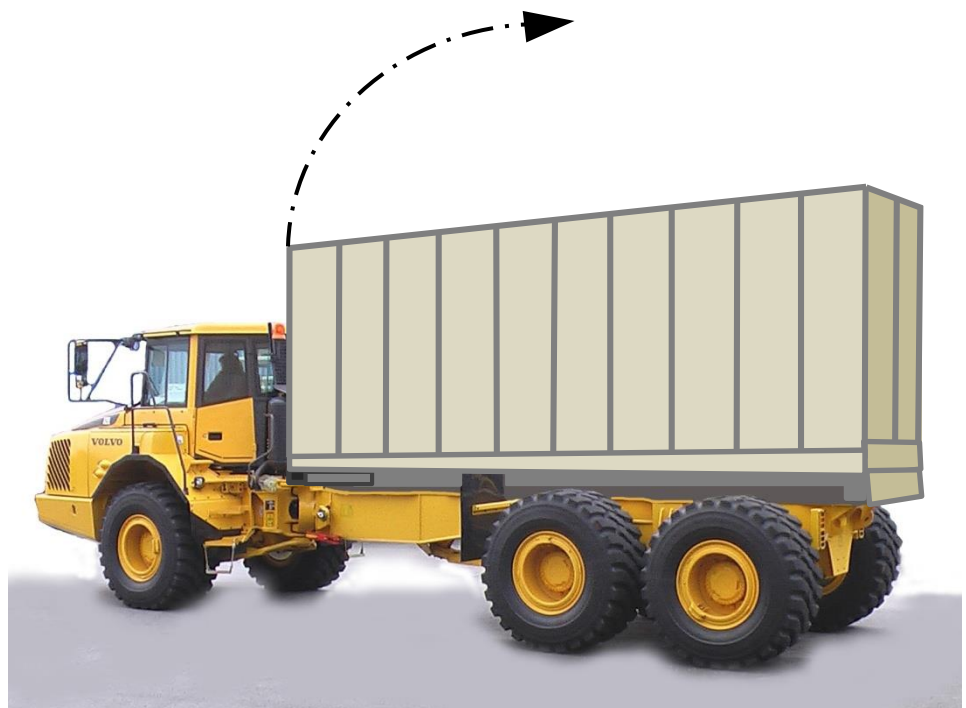

#### Spray nozzle water system

Water spreading ramp with several spray nozzles for watering large areas.  
Hydraulic pump and start/stop of watering from the cab.  
Designed for easy maintenance.

## Container hauler

The hauler can be equipped with a fixed frame or with a frame for tipping function.

For the tipping function the original hauler cylinders for dump body are used.

# Hook lift & Twin-Steer

## Hook lift

The XR S hook lift features a sliding mechanism that offers a low operating radius during the loading/unloading cycle. The lifting capacities for the XR S models range from 14 to 30 tonnes. The hook lift can handle Dump bodies, Flat beds, Hook lift containers, Roll-off containers and also Hook lift frames with Concrete mixer, Water tank etc.

### Example

#### Hook lift XR26S.56 for Volvo A25E HC59

Type: Telescope arm  
Capacity: 26 Ton  
G-Length: 56 (5520 mm between hook centre and roller centre).  
Tipping angle (°): 52  
Weight (kg): 2680

### Lorry platform standard

Swedish Standard SIS 3021

### Hydraulic system

Max. operating pressure is 30 Mpa.  
Recommended oil flow is 120 l/min.

## Twin-Steer

- 1 CDC Joystick Steering** placed in the left hand armrest front. Replace the ordinary steering wheel function when driving backwards.
- Rotating operator's seat.** Switches for the seat rotation lock is placed outside the left hand armrest.
- 2 Additional throttle and brake pedals.** They are active only if the operator's seat is in backward drive position. At the same time the pedals for forward driving are disconnected.
- 3 Relocated exhaust pipe** to side position for improved rear field of view.
- 4 Two additional rear working light** are mounted on the roof light frame, pointed backwards. They are switched together with the lights on the mudguards.
- 5 Rear view mirrors for forward view** when operator's seat in backward position.
